3	mane	priyanka	IT

The CSS box model is essentially a box that wraps around every HTML element. It consists of: margins, borders, padding, and the actual content. ... Margin - Clears an area outside the border. The margin is transparent.

TEXT DEMONSTRATION

Formatted Text Cannot Rightly Be Identified With Binary Files Or Be Distinct From ASCII Text. This Is Because Formatted Text Is Not Necessarily Binary, It May Be Text-Only, Such As HTML, RTF Or Enriched Text Files, And It May Be ASCII-Only. Conversely, A Plain Text File May Be Non-ASCII (In An Encoding Such As Unicode UTF-8).[Further Explanation Needed] Text-Only Formatted Text Is Achieved By Markup Which Too Is Textual, While Some Editors Of Formatted Text Like Microsoft Word Save In A Binary Format.
